BIOGRAPHIES	1

P R E F A C E

This is the second edition of WHO'S WHO IN COMMERCE AND INDUSTRY. The first edition was published two years ago, in 1936, and contained 6,516 biographical sketches of industrial and financial executives in the United States and Canada. This edition is world-wide in scope. It includes the biographies of 14,830 outstanding commercial and industrial leaders in every country throughout the world.

The volume lists the chairmen of boards, presidents and other important officers of industrial, manufacturing and transportation corporations; executives of utilities, communications and mining companies; heads of insurance companies, financial and investment institutions and banks; merchants of leading department stores and mercantile establishments, and elected officers of national and international trade associations.

Not all persons prominent in commerce and industry are included in this volume. Only the most important executives are listed. Generally, the book contains the heads of corporations whose net worth is over \$1,000,000. Aside from other special considerations, that is the basic principle underlying the admission of business leaders. Needless to say, with such stringent requirements for admission, only those deservant of inclusion can find their way into this book.

The head of any business embraced within this classification who has not yet been included is invited to send for a questionnaire on which to fill in particulars relating to his career for inclusion in the next edition of WHO'S WHO IN COMMERCE AND INDUSTRY. There is no charge for the inclusion of biographies in WHO'S WHO IN COMMERCE AND INDUSTRY. *Not a single name in the book has been paid for—and none can be paid for.*

Every effort has been made to insure the completeness of this work. The difficulties usually inherent in the compilation of a national "Who's Who" are multiplied many times when such a work becomes international. A staff of translation experts was soon found to be a necessity when questionnaires were returned in a variety of languages. Wars

PREFACE

raging in Spain and China mitigated against adequate representation from those countries. A thorough search into the fields of commerce, industry and finance in all other countries, however, revealed the outstanding personalities in business and trade.

The work received the kind of cooperation needed to prepare an accurate and authentic compilation. This cooperation was readily furnished by all from whom it was requested. Embassies, consulates, trade associations, international banking firms, and individuals in pivotal positions were glad to aid in making this undertaking possible. To all those who participated in compiling this work, and especially to the list of distinguished men who served on our Advisory Board, we wish to express our grateful appreciation.
